The aim of this course is to chart a comprehensive way of thinking and understanding the meaning, processes, and impact of colonialism and decolonization in the world. Focusing on the various contemporary colonial/imperial tools, including but not limited to the system of development aid, education, international laws, immigration policies, environmental policies, and racial tropes, employed to subjugate, exploit, and dominate colonized subjects, we will examine how discourses/structures that are employed for the purpose of liberation/freedom have now become part of the global colonial project. The main objective of this course is to explore various approaches to redefining decolonization, noting the changing meaning of colonialism.
